

# Green Tag Center Facility Certification

Dresser, Inc.  
Alexandria, Louisiana USA

## AVP Valve Lakeland, Florida

The Assembly and Repair Quality Programs for the above facility have been reviewed and the implementation at their facility verified. The quality program and implementation thereof conform to Dresser, Inc. standards, and applicable NBIC and ASME B&PV Code and Code Case requirements.

The scope of work that may be performed is the assembly and test of certain ASME B&PV Code Section I and Section VIII, Division 1, Consolidated® Safety and Safety Relief Valves capacity certified by the National Board of Boiler & Pressure Vessel Inspectors and listed in the National Board of Boiler & Pressure Vessel Inspectors Pressure Relief Device Certifications publication NB-18, for the above facility. The scope of valve repair work that may be performed and "VR" stamped, is the repair of Consolidated® valves that have been "V" or "UV" stamped during the original manufacture. Other Consolidated® valves may be repaired within the "VR" repair program, without applying the "VR" stamp, where they have not been originally stamped with the "V" or "UV" stamp.

This certification expires March 31, 2008.

Certified by Dresser Quality Assurance
